

# About our Company

Arre Digibot is dedicated to the development and distribution of digital printing products. T-shirt printers, sublimation printers, rotary heat presses, printing media, and software are all available from us. Shipping internationally at a low cost and of excellent quality.

We put our enthusiasm, devotion, and knowledge to work for our clients in order to make managing their textile printing as simple as possible. We enjoy what we do and are driven to provide exceptional service.

## Company Values

### Positioning

Become the leading manufacturer of digital printing equipment and consumables in the market.

### Concept

Integrity, pragmatism, perseverance, and inventiveness are all virtues. Customers must be satisfied in order for us to succeed.

### Goal

Internationalization, branding, specialization. Constantly strive to innovate.

### Mission

Self-achievement, green environmental preservation, customer success, and innovation and entrepreneurship!

# WHY US?

ARRE DIGIBOT offers one-stop shopping for a wide range of printing industry applications, with a product range that caters to all stages of the production process.

## INDUSTRY EXPERTS

ARRE DIGIBOT has accumulated knowledge and competence in a variety of industries through collaborating with many successful customers. We use this knowledge to create equipment and can offer significant business advice as a whole.

## TECHNICAL EXPERTS

ARRE DIGIBOT has amassed an excellent team of skilled and knowledgeable engineers and technicians over the years. These individuals bring technical and competitive advantages to Arre Digibot.

## PROFESSIONAL

Production, processing, welding, spraying, assembly, quality control, and testing are all components of the manufacturing process that we integrate. There will be no outsourcing! Everything is handled with professionalism.

# Markets

ARRE DIGIBOT printing machines are appropriate for a wide range of applications in a variety of markets. Cotton, naturals, mixes, and functional textiles are among the fabrics that can be used. From the fashion sector to home textiles to printed fabric and promotional items, there is something for everyone. ARRE DIGIBOT is unquestionably a winner!

## FASHION TEXTILE

There's no denying that the fashion industry is putting a greater emphasis on sustainability. Women's apparel from internationally famous fashion labels dominates the fashion sector.

## SPORTS APPAREL

Mixed synthetic textiles with a minimum of 60% synthetic fibers are commonly used for sportswear and outerwear, as well as mixed synthetic fabrics with a minimum of 60% synthetic fibers. Because the ink does not lay on top of the fabric, sublimation printers are great for sportswear. Because the dye particles are embedded in the cloth, the image is softer and more lasting.

## TRENDY HOODIES

This name-thick knitted sportswear, long-sleeved sports and leisure fir-is familiar to older people in various coastal cities, and the material is generally thicker than conventional long-sleeved. The cuffs are tight and elastic, and the underwear is made of the same material as the cuffs.
